/dgGeneralPDETerm.H"] --> B;
```

This diagram illustrates the relationship between three files in the OpenFOAM DGFoam source directory. At the top, a grey box represents the header file `dgFluxSolverManager.H`. Below it, two white boxes represent source files: `dgFluxSolverManager.C` on the left and `dgGeneralPDETerm.H` on the right. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
